## **NATIONAL GOALS OF EDUCATION**

Education in Kenya should:

**i) Foster nationalism and patriotism and promote national unity**

The people of Kenya belong to different communities, races and religions, but these differences need not divide them. They must be able to live and interact as Kenyans. It is a paramount duty of education to help young people acquire this sense of nationhood by removing conflicts and promoting positive attitudes of mutual respect, to live together in harmony and foster patriotism, and to make a positive contribution to the life of the nation.

**ii) Promote the social, economic, technological, and industrial needs for national development**

Education should prepare the youth of the country to play an effective and productive role in the life of the nation.

**a) Social Needs**

Education in Kenya must prepare children for changes in attitudes and relationships, which are necessary for the smooth progress of a rapidly developing modern economy. There is bound to be a silent social revolution following the wake of rapid modernisation. Education should assist our youth to adapt to this change.

**b) Economic Needs**

Education in Kenya should produce citizens with the skills, knowledge, expertise, and personal qualities that are required to support a growing economy. Kenya is building up a modern and independent economy that requires an adequate and relevant domestic workforce.

**c) Technological and Industrial Needs**

Education in Kenya should provide learners with the necessary skills and attitudes for industrial development. Kenya recognises the rapid industrial and technological changes taking place, especially in the developed world. We can only be part of this development if our education system is deliberately focused on the knowledge, skills and attitudes that will prepare our young people for these changing global trends.

**iii) Promote individual development and self-fulfillment**

Education should provide opportunities for the fullest development of individual talents and personality. It should help children to develop their potential interests and abilities. A vital aspect of individual development is the building of character.

**iv) Promote sound moral and religious values**

Education should provide for the development of knowledge, skills and attitudes that will enhance the acquisition of sound moral values and help children to grow up into self-disciplined, self-reliant and integrated citizens.

**v) Promote social equality and responsibility**

Education should promote social equality and foster a sense of social responsibility within an education system that provides equal educational opportunities for all. It should give all children varied and challenging opportunities for collective activities and corporate social service irrespective of gender, ability or geographical environment.

**vi) Promote respect for and development of Kenya's rich and varied cultures**

Education should instill in the youth of Kenya an understanding of past and present cultures and their valid place in contemporary society. Children should be able to blend the best of traditional values with the changing requirements that must follow rapid development to build a stable and modern society.

**vii) Promote international consciousness and foster positive attitudes towards other nations**

Kenya is part of the international community. It is part of the complicated and interdependent network of peoples and nations. Education should therefore lead the youth of the country to accept membership of this international community with all the obligations and responsibilities, rights and benefits that this membership entails.

**viii. Promote positive attitudes towards good health and environmental protection**

Education should inculcate in young people the value of good health for them to avoid indulging in activities that will lead to physical or mental ill health. It should foster positive attitudes towards environmental development and conservation. It should lead the youth of Kenya to appreciate the need for a healthy environment.

## LEARNING OUTCOMES FOR MIDDLE SCHOOL

By the end of Middle School, the learner should be able to:

1. Apply literacy, numeracy and logical thinking skills for appropriate self-expression.
2. Communicate effectively, verbally and non-verbally, in diverse contexts.
3. Demonstrate social skills, spiritual and moral values for peaceful co-existence.
4. Explore, manipulate, manage, and conserve the environment effectively for learning and sustainable development.
5. Practise relevant hygiene, sanitation and nutrition standards to promote health.
6. Demonstrate ethical behaviour and exhibit good citizenship as a civic responsibility.
7. Appreciate the country's rich and diverse cultural heritage for harmonious co-existence.
8. Manage pertinent and contemporary issues in society effectively.
9. Apply digital literacy skills for communication and learning.

## ESSENCE STATEMENT

Islamic Religious Education in Junior School aims at imparting Islamic knowledge, skills and values to the learner. This will enable them make appropriate decisions and effectively deal with challenges in accordance with Islamic principles and teachings. The Strands in this learning area are; Quran, *Hadith* (Teachings of the Prophet (S.A.W.)), Pillars of *Iman* (Faith), Devotional Acts, Akhlaq (Moral teachings), *Muamalat* (Social Relations) as well as Islamic Heritage and Civilisation. The competencies acquired in this learning area will give the learner a solid foundation for further studies and career paths such as Law, Banking and Finance, Entrepreneurship, Education, Social work and Chaplaincy, among others. The learning area will enable the learner to be a responsible steward who can make meaningful contributions to society and live a balanced life, which is at peace with Allah (S.W.T.), inner personality, respectful to the rights of others and conscious of the need to secure a glorified life in the Hereafter.

While sources of Islamic Knowledge are majorly Qur'an and Hadith, Vygotsky's Social Cultural Development Theory acknowledges that teaching and learning are highly social activities. The interactions with instructional materials and others

(teachers, peers, resource persons and community), influences the cognitive and affective developments of learners and, therefore, this theory is relevant in the learning of Islamic Religious Education.

### **SUBJECT GENERAL LEARNING OUTCOMES**

By the end of Junior School, the learner should be able to:

- a) Appreciate the Qur'an as the primary source of guidance.
- b) Deduce lessons from the selected *Surah* and *Hadith*, and apply them appropriately in daily life.
- c) Appreciate and emulate the practises of the Prophet (S.A.W.) as the best role model.
- d) Develop awareness and appreciation of the Pillars of *Iman* as the foundation of Islam.
- e) Demonstrate interest and positive attitude towards performance of acts of *Ibadah* (worship).
- f) Acquire Islamic values that will enable them act as responsible and ethical citizens
- g) Apply Islamic teachings to guide individuals to make positive contribution to social, political and economic developments in the society.
- h) Appreciate Islamic History as a basis for dynamic culture and civilisation for peaceful co-existence.

## CSL AT GRADE 9

### Introduction

In Grade 9, learners will undertake an integrated Community Service Learning (CSL) project of choice from a single or combined subject. The CSL project will enable the learner to apply knowledge and skills from other subjects to address a problem in the community. The implementation of the integrated CSL project will take a Whole School Approach, where all members of the school community including teachers, school administration, parents/guardians/ local community and support staff. It will be a collaborative effort where the teacher of Social Studies coordinates and works with other subject teachers to design and implement the integrated CSL project. The teachers will select a theme drawn from different Learning Areas and the broader categories of Pertinent and Contemporary Issues (PCIs) for the CSL project. It should also provide an opportunity for development of core competencies and nurturing of values. Learners will undertake a **variety of** integrated CSL group projects in teams of following a 6-step milestone approach as follows:

Milestone	Description
Milestone 1	<p><b>Problem Identification</b></p> <p>Learners study their community to understand the challenges faced and their effects on community members.</p> <p>Some of the challenges in the community can be:</p> <ul style="list-style-type: none"><li>• Environmental degradation</li><li>• Lifestyle diseases, Communicable and non-communicable diseases</li><li>• Poverty</li><li>• Violence and conflicts in the community</li><li>• Food security issues</li></ul>

Milestone 2	<b>Designing a solution</b>  Learners create an intervention to address the challenge identified.
Milestone 3	<b>Planning for the Project</b> Learners share roles, create a list of activities to be undertaken, mobilise resources needed to create their intervention and set timelines for execution
Milestone 4	<b>Implementation</b> The learners execute the project and keep evidence of work done.
Milestone 5	<b>Showcasing /Exhibition and Report Writing</b> Exhibitions involve showcasing learners' project items to the community and reflecting on the feedback  Learners write a report detailing their project activities and learnings from feedback

Milestone 6	<b>Reflection</b> Learners review all project work to learn from the challenges faced. They link project work with academic concepts, noting how the concepts enabled them to do their project as well as how the project helped to deepen learning of the academic concepts.
-------------	--

**NOTE:** The milestones will be staggered across the 3 terms of the academic calendar.

### **Assessment of CSL integrated Project**

Assessment for the integrated CSL group projects will be conducted formatively. The assessment will consider both the process and end product. This entails assessing each of the milestone stages of the integrated CSL group projects. They will focus on 3 components namely: skills from various learning areas applied in carrying out the projects, core competencies developed and values nurtured.
